A message from the
**Minnesota Women's
Economic Roundtable**

The Minnesota Women's Economic Roundtable (MWER) is pleased to co-sponsor publication of the inaugural issue of the *2008 Minnesota Census of Women Corporate Directors and Executive Officers*. MWER is a forum for high-profile women leaders to become more knowledgeable about cutting-edge economic issues, to discuss the implications of the economy on personal lives and to contribute to the formation of economic policies. As such, we are committed to advancing the cause of women in the boardroom and executive offices.

We also hope that by highlighting facts about the low number of women on Minnesota public company boards, we can lay the foundation for progress, thereby improving Minnesota corporations' governance.

Beth LaBreche *President*

Executive Summary

Corporate governance research suggests that well-functioning boards consist of directors who bring a variety of backgrounds and talents to the table.

Research also suggests that the presence of three or more women in corporate leadership settings, both boardroom and executive office, provides an important indicator of corporate diversity and correlates with improved financial performance.

This first-ever study of Minnesota women directors places the state's top 100 publicly held companies at the high end of the percentage of available board seats in the United States.

However, a closer look at the numbers — in light of the above-mentioned research and U.S. census data — clearly indicates room for improvement.

Given the availability of board-ready women and the organizations dedicated to advancing corporate governance in Minnesota, the sponsors of this report are optimistic that more Minnesota companies will make the effort to add more women to their boards and executive offices.

(Continued)

Executive Summary *(Continued)*

Highlights from the 2008 Minnesota Census *(The following data are based on SEC filing*

Women Corporate Directors

- 28 of the top 100 Minnesota public companies have no women directors, and 43 of these companies have only one woman on their boards.
- Women hold 14% of the available board seats in Minnesota's 100 largest publicly held companies, ranging from \$35 million to \$75 billion in revenue.
- A minority, 29%, of these companies have two or more women corporate directors; 43% of these companies have one; and 28% have none.
- Minnesota companies reporting larger revenues tend to have a greater number and percentage of women board members than smaller companies.
 - Of the 16 Minnesota *Fortune 500* companies, 75% have two or more women corporate directors; the remaining 25% have one.
 - Of the 13 Minnesota *Fortune 501–1000* companies, 39% have two or more women corporate directors; 54% have one; and 8% have none.
 - Of the remaining 71 companies, 17% have two or more women corporate directors; 45% have one; and 38% have none.

Women Executive Officers

- Women hold 16% of the available positions as executive officers in Minnesota's 100 largest publicly held companies, ranging from \$35 million to \$75 billion in revenue.
- A minority, 37%, of these companies have two or more women executive officers; 38% have just one women executive officer; and 25% have none.
- Minnesota companies reporting larger revenues tend to have a greater number and percentage of women executive officers than smaller companies.
 - All 16 of Minnesota's *Fortune 500* companies have women executive officers; 25% of the companies have 25% or more women executive officers; the remaining 75% of the companies have less than 25% women executive officers.
 - Eleven of the 13 Minnesota *Fortune 501–1000* companies have one or more women executive officers; 15% of the companies have 25% or more women executive officers; 69% of the companies have less than 25%.
 - Forty-eight of the 71 remaining companies have one or more women executive officers; 27% of the companies have 25% or more women executive officers; 41% of the companies have less than 25%.

20&20 Honor Roll

(as of June 30, 2008)

Corporate Directors and Executive Officers

- 63% of Minnesota's 100 largest publicly held companies have both one or more women directors and one or more women executive officers.
- 21% of Minnesota's 100 largest publicly held companies have one or more women directors or one or more women executive officers but not both.
- 16% of Minnesota's 100 largest publicly held companies have no women directors or executive officers.
- Minnesota companies reporting larger revenues are more likely to have women represented in both the boardroom and the executive suite than smaller companies.
 - All 16 Minnesota *Fortune 500* companies have both one or more women directors and one or more women executive officers.
 - Of the 13 Minnesota *Fortune 501–1000* companies, 77% have both one or more women directors and one or more women executive officers; the remaining 23% have either one or more women corporate directors or one or more women executive officers.
 - Of the remaining 71 companies, 52% have both one or more women directors and one or more women executive officers; 25% have either one or more women corporate directors or one or more women executive officers; and 23% have neither.

Minnesota companies with both 20% or more women corporate directors and 20% or more women executive officers receive honor roll recognition in the *Minnesota Census of Women Corporate Directors and Executive Officers*. Companies are listed by revenue category.

A message from the
**National Association
of Corporate Directors,
Minnesota Chapter**

The National Association of Corporate Directors (NACD), Minnesota Chapter is part of a national organization dedicated exclusively to serving the corporate governance needs of corporate boards and individual board members. As such, we are pleased to co-sponsor the first *Minnesota Census of Women Corporate Directors and Executive Officers*. We share the view that diverse boards are the most effective. Our hope is that by highlighting the facts and offering resources to board nominating committees, Minnesota companies will be able to add more women as directors in the future.

The NACD offers many programs, both in Minnesota and nationally, designed to improve the effectiveness of corporate directors. To learn more, please visit our website at www.nacdonline.org and at www.nacd-mn.org.

David Fisher *Minnesota Chapter President*

30 & 30

Special Distinction Company Snapshots

A number of Minnesota companies have taken a leadership role in incorporating talented women into their corporate governance structures, moving beyond the lone woman director or token executive officer. Two companies that have achieved 30% or more women directors and women executive officers are profiled below.

Target Corp.

The nation's No. 2 retail discount chain, Target has established a reputation for "cheap but chic" by offering upscale, fashion-forward merchandise through its 1,685 Target and Super Target stores in 48 states as well as through *Target.com*.

Ranked No. 31 on the *Fortune 500* list and the third largest company in the *Minnesota Census* sample, Target has a board comprised of 13 directors, four of whom are women (30.8%). Two of the women come from financial services, one from retail services and one from manufacturing:

Roxanne Austin, president, Austin Investment Advisors;

Mary N. Dillon, executive vice president and global chief marketing officer, McDonald's Corp.;

Mary E. Minnick, partner, Lion Capital; and

Anne M. Mulcahy, chair of the board and chief executive officer, Xerox Corp.

Roxanne Austin chairs the audit committee, and Anne Mulcahy chairs the finance committee and serves on the nominating committee.

Three of Target's 10 executive officers are women (30%). These include **Jodeen A. Kozlak**, executive vice president, human resources; **Kathryn A. Tesija**, executive vice president, merchandising; and **Beth Jacob**, senior vice president and chief information officer.

MTS Systems Corp.

MTS Systems is a leading global supplier of test systems and industrial position sensors. The company's testing hardware and software solutions help customers accelerate and improve their design, development and manufacturing processes and are used for determining the mechanical behavior of materials, products and structures. MTS had 1,575 employees and revenues of over \$400 million in 2007.

The board of directors of MTS Systems is comprised of eight directors, three of whom are women (37.5%):

Laura B. Hamilton, president and chief executive officer of MTS Systems, was appointed chair of the board as of September 2008 after serving as a board director since 2007.

Lois S. Martin, senior vice president and chief financial officer of Capella Education Co., has served on the MTS Systems board since 2006.

Barb J. Samardzich, vice president of Ford Motor Co. and vice president of Powertrain Engineering, received her appointment to the MTS board in 2001.

In addition, MTS Systems has appointed three women executive officers among a total of five executive officer positions (60%). These include **Laura B. Hamilton**, president and chief executive officer; **Susan E. Knight**, chief financial officer and vice president; and **Kathleen M. Staby**, vice president, human resources.

Call to Action

Twenty eight of the top 100 Minnesota public companies have no women directors, and 43 companies have only one woman on their boards.

A large number of qualified women candidates stand ready to join Minnesota public company boards, both in Minnesota and nationally. This report provides the names of 110 women who currently serve on Minnesota boards; most serve on only one Minnesota board and may have capacity to serve on more. In addition, Women Corporate Directors in Minnesota has 35 highly qualified and experienced women who may not currently serve on a Minnesota company board but who serve on at least one board outside the state.

To accelerate the pace at which women are added to boards, we urge companies to take advantage of these resources to help you enhance your board diversity.

Executive Search

Spencer Stuart has a global board of directors practice that helps clients identify candidates who meet specific criteria.

For more information contact Susan Boren in Minneapolis at sboren@spencerstuart.com or 612-313-2000.

Free Networks

Three organizations provide access to databases of women who already have for-profit company board experience.

- **Women Corporate Directors (WCD)** consists of 35 women in Minnesota and 450 nationwide who currently serve on corporate boards. To access this network, e-mail wcdmsp@gmail.com.
- **National Association of Corporate Directors (NACD)** has a national registry of prospective board members, along with a support team to help find someone who matches your criteria. Go to www.nacdonline.com/registry.
- **NASDAQ** has recently developed a database of board-ready women. Access this network at www.boardrecruiting.com/about.cfm.

The number of women
currently serving
on Minnesota's
corporate boards

If your board has only one woman or no women directors, please use these resources to build a stronger, more diverse board for your organization.

Overview

The 2008 Minnesota Census

The *2008 Minnesota Census of Women Corporate Directors and Executive Officers*, based on SEC filings as of June 30, 2008, provides a snapshot of the status of women serving on the boards and in the executive offices of Minnesota's 100 largest publicly held companies, with revenues ranging from \$35 million to \$75 billion. These include 16 *Fortune 500* companies, 13 *Fortune 501–1000* companies and 71 additional companies. In all three of these categories, women are underrepresented in both boardrooms and executive offices.

Research into corporate governance suggests that well-functioning boards are comprised of directors who bring a variety of backgrounds and talents to the table.¹ In the words of Jack Krol, former chairman and CEO of Dupont, "It's diversity of thought that is important and an advantage in board discussions and deliberations. That comes from having directors who don't all come from the same mold, but from different backgrounds and experiences."²

One or two such voices are insufficient. A critical mass is necessary for the benefits of diversity to be realized. Research suggests that the presence of three or more women in corporate leadership settings, both boardroom and executive office, provides an important indicator of corporate diversity.³

Beyond diversity of thought, additional research connects the presence of women leaders with improved financial performance. Catalyst's 2007 report entitled *The Bottom Line: Corporate Performance and Women's Representation on Boards* examined three measures of financial performance: return on equity, return on sales and return on invested capital. Findings indicated that *Fortune 500* companies with the highest percentage of women directors exceeded the performance of those with the lowest percentage by 53% for return on equity, 42% for return on sales and 66% for return on invested capital.⁴

A survey of investors conducted by Pepperdine University revealed that 51% of interviewed investors believe that the presence of women directors is a relatively important factor in their decision-making about whether to invest in a company.⁵ Talented women in boardrooms and in executive offices attract investors, increase the bottom line and contribute to good corporate governance.

Research connects the presence of women leaders with improved financial performance.

5 The Pepperdine Survey of Investors on Governance, CEOs and their Corporate Boards is available at <http://bschool.pepperdine.edu/research/investorssurvey>.

The Findings

Women Serving on Minnesota's Corporate Boards

Women Corporate Directors by Seats

- Women hold 14% (117) of the available 825 board seats in Minnesota's 100 largest publicly held companies. The percentage of seats held by women corporate directors tends to decrease with company size.
 - In the 16 Minnesota *Fortune 500* companies, women hold 20% (38) of the available 187 seats.
 - In the 13 Minnesota *Fortune 501-1000* companies, women hold 15% (18) of the available 120 seats.
 - In the remaining 71 companies, women hold 12% (61) of the available 518 seats.
- 110 women fill the 117 board seats held by women directors. Five women serve on two of Minnesota's largest 100 publicly held companies' boards. One woman serves on three Minnesota boards.

Women Corporate Directors by Seats

Comparisons with National Data

Minnesota's data on women corporate directors compare favorably with national trends. The percentage of board seats held by women directors in Minnesota (14%) falls on the higher end of the range (7.4% to 16.6%) reflected in the national data reported by ION in 2008. However, the numbers themselves from across the country highlight the limited roles played by women as corporate directors nationwide.

Nationally, women directors hold 15% of the available board seats in *Fortune 500* companies.* Of the 16 Minnesota *Fortune 500* companies, women directors hold 20% of the available board seats.

Nationally, 88% of *Fortune 500* companies have at least one woman director compared with 100% in Minnesota.* All 16 of Minnesota *Fortune 500* companies have at least one woman director.

Percentage of Corporate Board Seats Held by Women

* ION Status Report of Women Directors and Executive Officers of Public Companies in Ten Regions of the United States, March 2008.

Women Corporate Directors by Company

- Women hold board seats in 72% of Minnesota’s 100 largest publicly held companies. Women’s representation on boards tends to decrease significantly with smaller public companies.
 - Of the 16 Minnesota *Fortune 500* companies, 75% (12) have two or more women directors; the remaining 25% (4) have just one.
 - Of the 13 Minnesota *Fortune 501–1000* companies, 39% (5) have two or more women directors; 54% (7) have just one; and 8% (1) have none.
 - Of the remaining 71 companies, 17% (12) have two or more women directors; 45% (32) have just one; and 38% (27) have none.

A message from Women Corporate Directors, Minnesota Chapter

Women Corporate Directors (WCD) is committed to improving corporate governance and providing women who currently sit on corporate boards an opportunity to meet and discuss board issues. Founded in 2007, the Minnesota chapter of WCD has 35 members, all of whom are on one or more corporate boards.

Linda Hall Keller and Paula Meyer, members of the WCD executive committee, led development of the first *Minnesota Census*. Jackie Daylor, KPMG, another executive committee member, provided pro bono printing of the report. As further indication of its commitment to advancing the cause of women on boards, KPMG is a national sponsor of WCD.

WCD, Minnesota Chapter can provide free access to a list of 35 women in the state and 450 women nationwide who currently sit on corporate boards. If you are interested in recruiting from this highly qualified database, please e-mail wcdmsp@gmail.com.

**Paula Meyer and
Linda Hall Keller, Ph.D.**

Profile of Minnesota's Women Directors

Age and tenure

- Women directors tend to be younger than their male counterparts. The average age of women corporate directors is 54.4 in contrast to men's average age of 59.5.
- Twenty-six of these 100 companies (26%) have directors age 72 or older, the most prevalent age of mandatory retirement. All of these directors are men.
- Approximately twice the number of men directors (12%) have served over the 15-year term maximum recommended by the NACD than women directors (6%).
- 18 of the 100 companies (18%) have 25% or more board seats held by directors serving 15+ years.

A message from Spencer Stuart

Since 1999, Spencer Stuart has reported on the number of women on boards of the top 30 Minnesota-based public companies in its annual *Minnesota Board Index*. When we learned about the first-annual *Minnesota Census of Women Corporate Directors and Executive Officers*, we were happy to sponsor this important study. The *Minnesota Census* goes beyond the 30 largest companies to include data about the top 100 companies and allows us to gain a deeper understanding of trends related to women on corporate boards and in the executive suite.

Over the past 50 years, Spencer Stuart has observed that clients who tie diversity and inclusion into their business strategy achieve enhanced productivity, customer satisfaction and, ultimately, performance. As recruiters, we tap into our deep knowledge of the current candidate pool, coupled with marketplace realities, and work closely with our colleagues throughout the firm to present a diverse slate of candidates for every search.

Spencer Stuart's global team of consultants has access to more than 350,000 experienced, senior-level, diverse executives — defined as women and people of color — in our proprietary database. In addition, members of our Diversity Practice stay current on global best practices for corporate diversity and diversity recruitment by participating in conferences, seminars and preparation of intellectual capital.

If we can assist you in building your board of directors or executive team, please do not hesitate to contact us.

Susan S. Boren

The Findings

Women Corporate Leadership in the Boardroom and the Executive Office

- 63% of Minnesota's 100 largest publicly held companies have both women directors and women executive officers.
- 21% of Minnesota's 100 largest publicly held companies have either women directors or women executive officers but not both.
- 16% of Minnesota's 100 largest publicly held companies have no women directors or executive officers.
- Minnesota companies reporting larger revenues are more likely to have women represented in both the boardroom and the executive suite than companies reporting smaller revenues .
 - All 16 of Minnesota's *Fortune 500* companies have both women directors and women executive officers.
 - Of the 13 Minnesota *Fortune 501-1000* companies, 77% of the companies (10) have both women directors and women executive officers; the remaining 23% of the companies (3) have either women directors or women executive officers.
 - Of the remaining 71 companies, 52% of the companies (37) have both women directors and women executive officers; 25% of the companies (18) have either women directors or women executive officers; and 23% of the companies (16) have none.

Women Corporate Directors and Executive Officers by Company

A message from the College of St. Catherine

Soon to be St. Catherine University (as of June 1, 2009), the College of St. Catherine is the only private college in Minnesota to offer degrees at the associate, baccalaureate, master's and doctoral levels. Throughout the curriculum, students are educated to demonstrate ethical leadership grounded in social responsibility.

Founded as a liberal arts college for women in 1905 by the Sisters of St. Joseph of Carondelet, St. Kate's is now the largest college for women in the United States. More recently, the college has become known for its professional and graduate programs, including the Master of Arts in Organizational Leadership. Open to men and women, the MAOL was the first multidisciplinary graduate program in leadership in the country. MAOL students and graduates apply their leadership skills in a broad range of for-profit and nonprofit fields, including business, education, the arts, banking, media, healthcare, government, travel and human services.

St. Kate's also brings working women back to campus for career development, networking and holistic thinking about their professions through programs such as the annual Forum on Women in Leadership, the Northern Stars Leadership Breakfast series and Leaders of the New Millennium.

The opportunity to conduct the research for the first *Minnesota Census of Women Corporate Directors and Executive Officers* lines up well with the mission of St. Catherine. We look forward to next year's study and the opportunity to join ION, a national consortium that provides for comparability for data. The *2008 Minnesota Census* (based on SEC filings as of June 30, 2008) provides a starting point both for examining the status of women within Minnesota companies and comparing that status with women nationwide.

Conclusion

Women hold a small percentage of the available board of director seats and executive officer positions in Minnesota's 100 largest publicly held companies. Twenty-eight percent of Minnesota's top 100 companies have no women corporate directors; 25% have no women executive officers. Most often, companies include just one woman corporate director on their boards. As well, Minnesota companies most frequently report just one woman executive officer in their ranks. Research suggests that one voice is not enough.

“The number of women on a board makes a difference. While a lone woman can and often does make substantial contributions, and two women are generally more powerful than one, increasing the number of women to three or more enhances the likelihood that women's voices and ideas are heard and that boardroom dynamics change substantially.¹”

A critical mass of three or more women positively affects corporate governance in multiple ways. First, research indicates that women frequently bring the perspectives of multiple stakeholders to the forefront — employees, customers and suppliers as well as shareholders and the larger community. Second, women's leadership style opens the dialogue and engages management and the board in a more collaborative process. Third, research suggests that women are more willing to tackle challenging issues directly, which results in improved decision-making. Increasing the number of women in corporate leadership roles is a matter of good governance.²

The *2008 Minnesota Census of Women Corporate Directors and Executive Officers* indicates that the percentage of both women corporate directors and women executive officers in Minnesota's 100 largest publicly held companies tends to decrease with company size. Minnesota's *Fortune 500* companies provide a stark contrast to the 71 non-*Fortune* ranked companies.

Where are women to come from to fill a portion of these positions, especially the many positions in smaller companies, and what qualifications are required? Traditionally, board members have been drawn from the ranks of current or retired CEOs. The *Minnesota Census* identifies just four women CEOs among Minnesota's 100 largest publicly held companies — an insufficient pool.

However, high-level corporate experience or the abilities, knowledge and skills needed to serve boards well are not solely the province of CEOs. Research suggests that casting a broader net into senior management provides a pool of successful women well-qualified for corporate governance.³ The *Minnesota Census* provides a list of women currently holding executive officer positions in Minnesota companies. Beyond the executive offices, research identifies successful women lawyers, consultants, nonprofit executives, entrepreneurs and academics as qualified candidates for board service.⁴ Women from all of these backgrounds currently serve on Minnesota boards, illustrating the successful use of the extended pool of qualified women candidates available for corporate governance.

Examples exist of smaller Minnesota companies such as those listed on our Honor Roll that have moved well beyond the token one woman director and one woman executive officer. After surveying the body of research of good corporate governance, we encourage more Minnesota companies to join them.

Methodology Summary

The 2008 *Minnesota Census of Women Corporate Directors and Executive Officers* examines the 100 largest publicly held companies headquartered in Minnesota as ranked by 2007 net revenues in the *Minneapolis Star Tribune 100: 17th Annual Report* (April 2008). Excluded from the list are closely held companies, cooperatives and fraternal benefits organizations and over-the-counter stocks. Of Minnesota's 20 *Fortune 500* companies, four companies are not represented in the *Minnesota Census* data sample: Land O'Lakes, CHS Inc., Thrivent Financial and Minnesota Life Insurance. Although the SEC lists these as public companies with more than 500 shareholders, they are not publicly traded on a stock exchange.

Data for the 2008 *Minnesota Census* were collected from company filings with the Securities and Exchange Commission (SEC), including proxy statements (DEF 14A), annual reports (Form 10-K) and current reports (Form 8-K). Accessed online through EDGAR, the most recent SEC filings through June 30, 2008, were reviewed for data collection. Data confirmation sheets were mailed to the corporate secretary and chief executive officer of each company requesting verification of the information and notification of any changes occurring before the *Census* cutoff deadline of June 30, 2008. Follow-up phone calls were made to the companies that had not responded by the requested deadline. The company response rate to data confirmation requests was 74%. Changes in board membership, executive officer appointments or company ownership or bankruptcy filings that occurred after the period covered by the June 30, 2008, filings are not reflected in this analysis.

Data gathered and confirmed on each of the 100 companies included the following:

- The total number of corporate directors
- The number, names, titles and ages of women directors
- The names and ages of men directors
- The names of directors with board tenure of 15 years or greater
- The total number of executive officers
- The number, names and titles of women executive officers
- The total number of most highly compensated officers (named officers) as reported to the SEC
- The names and titles of women executive officers included in the most highly compensated officer list.

Criteria for inclusion in the "executive officer" category vary by company. To be consistent, only those individuals formally designated as executive officers in SEC filings are used in the *Census*. The top earners (usually five) in the company are defined as the most highly compensated executive officers — the "named executive officers" in each company's proxy statement.

The 2008 *Minnesota Census* relies upon industry groupings as designated in the *Star Tribune 100* listing.

All reasonable steps have been taken to verify the accuracy of the data. Any remaining errors or omissions are the sole responsibility of the researchers.

Acknowledgements

The College of St. Catherine

The *2008 Minnesota Census* would not be possible without the excellent research assistance provided by Master of Arts in Organizational Leadership (MAOL) graduate students **Ann M. Keeney** and **Leah R. Rudeen**. **Valerie Krech**, MAOL program coordinator, provided critical administrative support. Research, data analysis and writing were completed by **Joann Bangs**, assistant professor of economics and MAOL, and **Rebecca Hawthorne**, assistant professor of MAOL and MAOL program director.

We also thank the college's Office of Marketing and Communications, led by Director **Amy Gage**, for its editorial and design oversight of this report. We particularly acknowledge **Mary Beth Arthaud**, print communications manager; **Kelly Barak**, graphic designer; **Julie Michener**, media relations manager; and **Terry Monahan**, proofreader.

LaBreche

Beth LaBreche is president of the Minnesota Women's Economic Roundtable and her own advertising and design firm, LaBreche. LaBreche provided pro bono design services for the report.

Padilla Speer Beardsley

Lynn Casey is both a member of the Minnesota Women's Economic Roundtable and CEO of Padilla Speer Beardsley, a public relations consulting firm. Lynn took a leadership role in developing our media and public relations plan.

KPMG, Minneapolis

Jackie Daylor, partner, provided pro bono printing support from KPMG. Special thanks to Betsy Berge and the KPMG print shop for doing the printing. KPMG demonstrates its strong, ongoing commitment to women on boards by acting as a national sponsor of Women Corporate Directors.
